OBJECTIVE

Motivated BS Software Engineering student with strong academic performance (CGPA: 3.94) and hands-on experience in AI fundamentals, frontend development, Android application development, and UI/UX design. Seeking software development, AI, or frontend development internship opportunities to apply programming knowledge, problem-solving skills, and design abilities in real-world applications.

EDUCATION

PUCIT, Lahore

2024 – PRESENT

BS Software Engineering (4th Semester) — CGPA: 3.94

- Academic Performance: Core focus on computing fundamentals with an outstanding academic record.
- Relevant Coursework: Data Structures, Software Requirements Engineering (SRE), Human-Computer Interaction (HCI), Database Systems, Artificial Intelligence, Mobile Application Development

TECHNICAL SKILLS

Programming: C, C++, Python

Web Track: HTML, CSS, JavaScript

Mobile Development: Kotlin, Android Studio

UI/UX Design: Figma, Canva, Responsive Design, Prototyping

Libraries: NumPy, Pandas

Tools & IDEs: VS Code, PyCharm, Git/GitHub

PROJECTS

AI & Software Engineering

- **AI Algorithms Project (In Progress)** — Developing core artificial intelligence sequence maps and algorithmic optimizations.
- **Risk Assessment Tool (SE Project)** — Engineered system requirement framework architectures to dynamically evaluate software development deployment challenges.

HCI & Design

- **Travel App UI/UX Design** — Designed a fully interactive, responsive mobile interface mapping visual hierarchies cleanly on Figma.

Mobile App Development

- **Event Management & Admin Portal (In Progress)** — An android app for event discovering and management

Web Projects

- **Portfolio Website** — Custom developer landing interface demonstrating modular responsive front-end components.
- **Tic Tac Toe Game** — JavaScript interactive logic engine handling discrete dynamic board states and win conditions.
- **Stone Paper Scissors Game** — Clean interface build utilizing native front-end event listeners and conditional score logic.

- **Neon Calculator App** — Formatted accurate mathematical operations interface stylized using modern glowing CSS configurations.
- **Ecommerce website (In Progress)** — beginner friendly ecommerce website (frontend) MyShop

Other Engineering Projects

- **Dual Axis Solar Tracker** — Hardware-software integrated dynamic system adjusting structural position coordinates for optimal solar gain.
- **Python Programming Projects** — Suite of clean-code algorithmic solutions automating complex script and data manipulations.

CERTIFICATIONS

Python Programming Certification

Completed

NAVTTTC (*National Vocational and Technical Training Commission*)

SOFT SKILLS & LEADERSHIP

- **Leadership & Team Management:** Directed collaborative academic group sprints, setting internal timeline milestones and aligning developer focus areas.
- **Communication Skills:** Refined presentation abilities pitching technical requirement architectures clearly to assignment evaluators.
- **Teaching Experience:** Simplified programming logic frameworks, mentoring peers through algorithms and code troubleshooting syntax.
